

# Bravo Bravo

BravoBravo, is an Online Learning platform presented by the National Sea Rescue Institute (NSRI). It is designed by the technology team who developed GETSMARTER and is online learning at its best. Easy to follow from your computer, tablet or phone – the material is in bite size modules that you can do in your own time and at your own pace. The design is professional with lots of information – but not overwhelming. The first course that is available is the Skippers Guide for small vessels. It is set out in a series of modules with a short quiz (or questionnaire) after each section. The material is an excellent introduction for all boat users and covers the entire syllabus for the SAMSA small vessel certificate of competence. It is a useful course to complete as preparation for the SAMSA skippers examinations.
